DETAILED ACTION

Response to Amendment

1. Acknowledgement is made of the Request for Continued Examination filed by the Applicant on 3/29/06, in which: independent Claims 1,13,14 and 24 were amended. **Claims 1-49 are currently pending in U.S. Application Serial No. 09/924,698, and an Office Action on the merits follows.**

Information Disclosure Statement

2. The information disclosure statement (IDS) filed on 11/30/05 has been acknowledged and considered by the Examiner. An initialed copy of the PTO-1449 is included in this correspondence.

Allowable Subject Matter

3. **Claims 1-49 are allowed.**

4. The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches or suggests an active-matrix image display device comprising mode switching means for periodically changing between a scanning mode during which an active matrix is vertically scanned and in which a charge-pump power supply operates at a first frequency, and a hold mode during which no video signal is applied to any display cells, and in which the charge-pump power supply operates at a second non-zero frequency smaller than the first frequency, wherein the mode switching means operates so that a duration of the hold mode is equal to or longer than a duration of the scanning mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Murakami et al. (U.S. Patent No. 6,243,066 B1) illustrates a timing diagram for an active-matrix image display device in FIG. 2 comprising a scanning mode (i.e., DATA DISPLAY PERIOD) and a hold mode (i.e., HORIZONTAL RETRACE PERIOD) during which no video signal is applied to any of the display cells.
